Subject: Building 1/36 Soil Vapor Extraction System Shutdown, Boeing Former C-6 Facility
19503 South Normandie, Los Angeles, CA
(File No. 95-036; SLIC No. 0410; Site ID No. 1846000)

Dear Ms. Townsend,

This letter serves as notification that Boeing Corporate Real Estate (CRE) intends to shutdown the Soil Vapor Extraction (SVE) system currently in operation at the Building 1/36 area within Parcel C at the Former C-6 Facility in Los Angeles. Based on monitoring results, discussions with the Los Angeles Regional Water Quality Control Board, and experience with similar systems, CRE believes that the system currently meets applicable closure criteria. Formal system closure will be requested in the future in conjunction with closure activities for Parcel C as a whole. The system will not be decommissioned and will be available for restart in the future if necessary. The shutdown is scheduled to occur during the week of June 30, 2008.

If you have any questions, feel free to contact the undersigned at 805-563-2426.

Sincerely,
HALEY & ALDRICH, INC.

A handwritten signature in dark ink, appearing to read 'Joe Weidmann'. The signature is fluid and cursive, with the first name 'Joe' being more prominent than the last name 'Weidmann'.

M. Joseph Weidmann,
Senior Geologist
